

Senior Frontend Engineer with 7+ years owning large React codebases from architecture through production. I lead frontend teams, work cross-functionally with design, backend and DevOps, and turn Figma into pixel-perfect, accessible interfaces. I make the structural decisions a codebase has to live with, and take responsibility for how it performs and how safely it ships.

EXPERIENCE

Hobber · HQ Abu Dhabi, UAE

JAN 2026 — PRESENT

Senior Frontend Engineer — Lead
MARKETPLACE PLATFORM FOR ENTERTAINMENT, RECREATION, DINING & TOURISM VENDORS

- React

TypeScript

Feature-sliced architecture

REST

Real-time
- Lead frontend development of the Hobber vendor platform, architecting the vendor dashboard from an empty repository in React and TypeScript on a modular, feature-sliced structure.
 - Shipped seven core platform modules — authentication, vendor accounts, dashboards, scheduling, payouts, integrations, and team access — as independent slices over one shared component layer.
 - Built the vendor workflows on top: activity management, booking flows, stock scheduling, discount logic, and content management.
 - Set the architectural boundaries the codebase is held to, so a new domain is a new folder rather than a refactor, with cross-slice contracts enforced by TypeScript at build time.
 - Set up the testing layer from scratch — Vitest for unit and integration, Playwright for end-to-end across the vendor workflows.
 - Partner with backend and DevOps engineers on API contracts, authentication systems, and real-time platform features.

Axinom · HQ Fürth, Germany

MAR 2024 — NOV 2025

Senior Frontend Engineer — Lead
ENTERPRISE MEDIA TECHNOLOGY DELIVERED ON THE MOSAIC PLATFORM

- React

Next.js

TypeScript

GraphQL

SCSS

Shaka Player / DRM

i18n

Azure DevOps
- Led the frontend team building high-performance web applications for clients including the Goethe-Institut and the Lindau Nobel Laureate Meetings, delivering multiple products 0→1 through full development, testing, and production release cycles.
 - Reduced page load time ~15% through bundle optimization, lazy loading, and caching improvements.
 - Built on Axinom's Mosaic micro-frontends (Media, Catalogue, Entitlement, DRM) and its APIs for content synchronization and metadata management, rather than hand-rolling media delivery.
 - Implemented secure DRM playback with Shaka Player, and designed i18n in from the start for multi-language experiences across regions.
 - Worked directly with designers to translate Figma into pixel-perfect, responsive interfaces, holding SEO and WCAG-aligned accessibility across every customer-facing surface.
 - Owned client-facing technical communication — requirements, feasibility, UX trade-offs, and scope — mentored junior engineers, enforced coding standards, and kept CI/CD stable with DevOps across environments.

Kodez · HQ Melbourne, Australia

MAR 2021 — FEB 2024

Senior Frontend Engineer
ENTERPRISE CMS FOR SERVICE MANAGEMENT AND LOGISTICS

- React

TypeScript

Storybook

Cypress

Redux

TanStack Query

Material UI

Node.js / Express

AWS
- Architected and delivered a React CMS from 0→1 to MVP as a microarchitecture applying SOLID principles, then led 40+ production releases on it.
 - Introduced TDD with Cypress and drove automated coverage ~90% on critical paths, gated in CI/CD — the reason release throughput stayed safe at that volume.
 - Built a Storybook-based reusable component library that cut frontend development time ~30% across projects.
 - Reduced page load time ~40% through code-splitting, lazy loading, and asset optimization, with assets served from AWS S3.
 - Migrated a legacy PHP/jQuery application to React and ExpressJS incrementally without freezing client delivery — and built Node.js BFF layers with the backend team to reduce API latency.
 - Built REST integrations against the client's enterprise vendor stack — Amtek (Australia), running on Fiserv, Toshiba, NTT DATA, Park Assist and City systems — across a 250+ table schema.
 - Translated Figma designs into pixel-perfect, responsive interfaces; set frontend standards and ran code reviews as the team scaled from 10 to 60+ engineers.

RaSoft · HQ Colombo, Sri Lanka

DEC 2018 — FEB 2021

Frontend Engineer (from Frontend Engineer Intern)
SEED-STAGE STARTUP — INTERNAL SYSTEMS AND WEB PRODUCTS

- React.js

JavaScript

SCSS

Agile / Scrum
- Delivered an Employment Management System from concept to production as the end-to-end UI owner, in React.js, JavaScript, HTML, and SCSS.
 - Rebuilt the company website around responsive layout and accessibility, lifting UX and conversion ~15%; the same push contributed to ~20% growth in client acquisition.
 - Improved application performance through refactoring and component-level optimization, and ran code reviews and pair-programming sessions to keep the codebase maintainable as it grew.

CORE STACK

REACT & NEXT.JS

- React

Next.js (App + Pages Router)

SSR / CSR / ISR
- Hydration

Suspense

Error boundaries
- Memoization & render isolation

Reconciliation

UI, INTERACTION & DESIGN SYSTEMS

- Pixel-perfect Figma implementation

Design collaboration & handoff
- Interaction & motion design

Storybook

Design tokens & theming
- Tailwind CSS

SCSS

Material UI

Radix UI

Atomic Design

PERFORMANCE

- Core Web Vitals (LCP, CLS, INP)

Bundle analysis

Code-splitting
- Lazy loading

Caching strategies

Lighthouse

SECURITY

- XSS prevention

Secure authentication flows

Token handling
- Content validation

Secure API integration patterns
- Dependency risk awareness

AI-ASSISTED DELIVERY

- Agent orchestration

MCP integrations

Synthetic test data
- Automated PR & deploy workflows

LANGUAGE & FRAMEWORKS

- TypeScript

JavaScript

Zod

Typed API boundaries
- Angular (legacy systems)

STATE & DATA

- TanStack Query

Redux Toolkit

Zustand

React Hook Form
- REST

GraphQL

Algolia search

Cache invalidation

TESTING & QUALITY

- Vitest

Playwright

Jest

Cypress

TDD
- E2E & integration

CI quality gates

WCAG accessibility
- BrowserStack

BACKEND & DELIVERY

- Node.js

ExpressJS (BFF)

PHP / Laravel
