

Mohammed Rezaan Riyaz

SENIOR FRONTEND ENGINEER

React · Next.js · TypeScript · 7+ years

Senior Frontend Engineer with 7+ years owning large React codebases from architecture through production. I lead frontend teams, work cross-functionally with design, backend and DevOps, and turn Figma into pixel-perfect, accessible interfaces. I make the structural decisions a codebase has to live with, and take responsibility for how it performs and how safely it ships.

EXPERIENCE

Hobber · HQ Abu Dhabi, UAE

JAN 2026 — PRESENT

Senior Frontend Engineer — Lead

MARKETPLACE PLATFORM FOR ENTERTAINMENT, RECREATION, DINING & TOURISM VENDORS

React TypeScript Feature-sliced architecture REST Real-time

- Lead frontend development of the Hobber vendor platform, architecting the vendor dashboard from an empty repository in React and TypeScript on a modular, feature-sliced structure.
- Shipped seven core platform modules — authentication, vendor accounts, dashboards, scheduling, payouts, integrations, and team access — as independent slices over one shared component layer.
- Built the vendor workflows on top: activity management, booking flows, stock scheduling, discount logic, and content management.
- Set the architectural boundaries the codebase is held to, so a new domain is a new folder rather than a refactor, with cross-slice contracts enforced by TypeScript at build time.
- Set up the testing layer from scratch — Vitest for unit and integration, Playwright for end-to-end across the vendor workflows.
- Partner with backend and DevOps engineers on API contracts, authentication systems, and real-time platform features.

Axinom · HQ Fürth, Germany

MAR 2024 — NOV 2025

Senior Frontend Engineer — Lead

ENTERPRISE MEDIA TECHNOLOGY DELIVERED ON THE MOSAIC PLATFORM

React Next.js TypeScript GraphQL SCSS Shaka Player / DRM i18n Azure DevOps

- Led the frontend team building high-performance web applications for clients including the Goethe-Institut and the Lindau Nobel Laureate Meetings, delivering multiple products 0→1 through full development, testing, and production release cycles.
- Reduced page load time ~15% through bundle optimization, lazy loading, and caching improvements.
- Built on Axinom's Mosaic micro-frontends (Media, Catalogue, Entitlement, DRM) and its APIs for content synchronization and metadata management, rather than hand-rolling media delivery.
- Implemented secure DRM playback with Shaka Player, and designed i18n in from the start for multi-language experiences across regions.
- Worked directly with designers to translate Figma into pixel-perfect, responsive interfaces, holding SEO and WCAG-aligned accessibility across every customer-facing surface.
- Owned client-facing technical communication — requirements, feasibility, UX trade-offs, and scope — mentored junior engineers, enforced coding standards, and kept CI/CD stable with DevOps across environments.

Kodez · HQ Melbourne, Australia

MAR 2021 — FEB 2024

Senior Frontend Engineer

ENTERPRISE CMS FOR SERVICE MANAGEMENT AND LOGISTICS

React TypeScript Storybook Cypress Redux TanStack Query Material UI Node.js / Express AWS

- Architected and delivered a React CMS from 0→1 to MVP as a microarchitecture applying SOLID principles, then led 40+ production releases on it.
- Introduced TDD with Cypress and drove automated coverage past 90% on critical paths, gated in CI/CD — the reason release throughput stayed safe at that volume.
- Built a Storybook-based reusable component library that cut frontend development time ~30% across projects.
- Reduced page load time ~40% through code-splitting, lazy loading, and asset optimization, with assets served from AWS S3 behind CloudFront.
- Migrated a legacy PHP/jQuery application to React and ExpressJS incrementally, cutting technical debt ~25% without freezing client delivery — and built Node.js BFF layers with the backend team to reduce API latency.
- Built REST integrations against the client's enterprise vendor stack — Amtek (Australia), running on Fiserv, Toshiba, NTT DATA, Park Assist and City systems — across a 250+ table schema.
- Translated Figma designs into pixel-perfect, responsive interfaces; set frontend standards and ran code reviews as the team scaled from 10 to 60+ engineers.

RaSoft · HQ Colombo, Sri Lanka

DEC 2018 — FEB 2021

Frontend Engineer (from Frontend Engineer Intern)

SEED-STAGE STARTUP — INTERNAL SYSTEMS AND WEB PRODUCTS

React.js JavaScript SCSS Agile / Scrum

- Delivered an Employment Management System from concept to production as the end-to-end UI owner, in React.js, JavaScript, HTML, and SCSS.
- Rebuilt the company website around responsive layout and accessibility, lifting UX and conversion ~15%; the same push contributed to ~20% growth in client acquisition.
- Improved application performance through refactoring and component-level optimization, and ran code reviews and pair-programming sessions to keep the codebase maintainable as it grew.

CORE STACK

REACT & NEXT.JS

React Next.js (App + Pages Router) SSR / CSR / ISR Hydration Suspense Error boundaries Memoization & render isolation Reconciliation

UI, INTERACTION & DESIGN SYSTEMS

Pixel-perfect Figma implementation Design collaboration & handoff Interaction & motion design Storybook Design tokens & theming Tailwind CSS SCSS Material UI Radix UI Atomic Design

PERFORMANCE

Core Web Vitals (LCP, CLS, INP) Bundle analysis Code-splitting Lazy loading Caching strategies Lighthouse

SECURITY

EDUCATION

BSc (Hons) Computer Science & Software Engineering — First Class

University of Bedfordshire · 2022

Dissertation: BlockVote — blockchain-based e-voting on Ethereum (Solidity, Truffle, React, MetaMask)

Pearson BTEC Level 5 HND — Computing (Software Engineering)

British College of Applied Studies · 2020

Higher Diploma — Mechatronics Engineering

ICBT, moderated by Cardiff Metropolitan University · 2019
